

## Balbriggan Student Undertakes Environmental Project

Deirdre Harford is a transition year student in Loreto Secondary School Balbriggan and, with her team, has undertaken to complete a project on an environmental issue. She chose climate change and deforestation.

During this project her team visited primary schools, set up a website and attended seminars with the former president, Mary Robinson in the Mansion House and received the prestigious **Junior Spider award** for their

efforts. The team's only funding comes from fellow students, through events such as cake sales. Deirdre's message is clear - help combat climate change, recycle this newspaper, cut back, not down! This message is brought to you by 'Team Tree To One'. Deirdre says that the project is near completion and hopes that people will heed this simple message.
